

Lucy Kates

SENIOR PRODUCT DESIGNER

lucyrkates@gmail.com

linkedin.com/in/lucyrkates

Berkeley, CA

I'm a senior product designer with 6+ years of experience, currently at LinkedIn designing how members present their full professional identity. Previously I've worked on conversational agents and enterprise sales tools. I bring systems thinking to ambiguous problems and prioritize design that's equitable and human-centered.

EXPERIENCE

LinkedIn

Senior Product Designer

Oct 2023 – Present

- Led design for integrating third-party apps onto the LinkedIn profile, allowing members to surface real projects, videos, and articles. The work spanned partners from GitHub to TikTok and established a scalable pattern for how external content shows up on LinkedIn.
- Contributed to a 6-month venture bet exploring AI-native collaboration, defining UX paradigms for working alongside intelligent agents. Work influenced continued investment in the space across LinkedIn and Microsoft.

Product Designer

Sep 2020 – Oct 2023

- Designed core workflows and features for Sales Navigator, including [Relationship Map](#) — a collaborative account mapping tool that helps sellers visualize buying committees, track stakeholder changes, and identify growth opportunities using real-time LinkedIn data.
- Developed reusable components for the Sales Solutions design system, improving pattern consistency across the org.

Uber

Contract Product Designer

Jan – Apr 2020

- Designed visual affordances for Uber's product selection screen to improve ride option discoverability, grounded in data showing only 10% of riders scrolled the full product list.
- Designed UX for Business Hub, a centralized destination for business riders to manage profiles, benefits, and expense integrations.

Product Design Intern

May – Aug 2019

- Redesigned the Flexible Cancellations benefit experience for Uber Rewards Gold members, improving awareness and comprehension across the full cancellation-to-rebook flow.
- Explored UX for UberX Diamond, a new ride tier for high-value members, navigating tradeoffs between product differentiation and booking flow friction.

EDUCATION

Georgia Institute of Technology

2020

B.S. Industrial Design · Highest Honors
